

Introducing — TrueFoundry

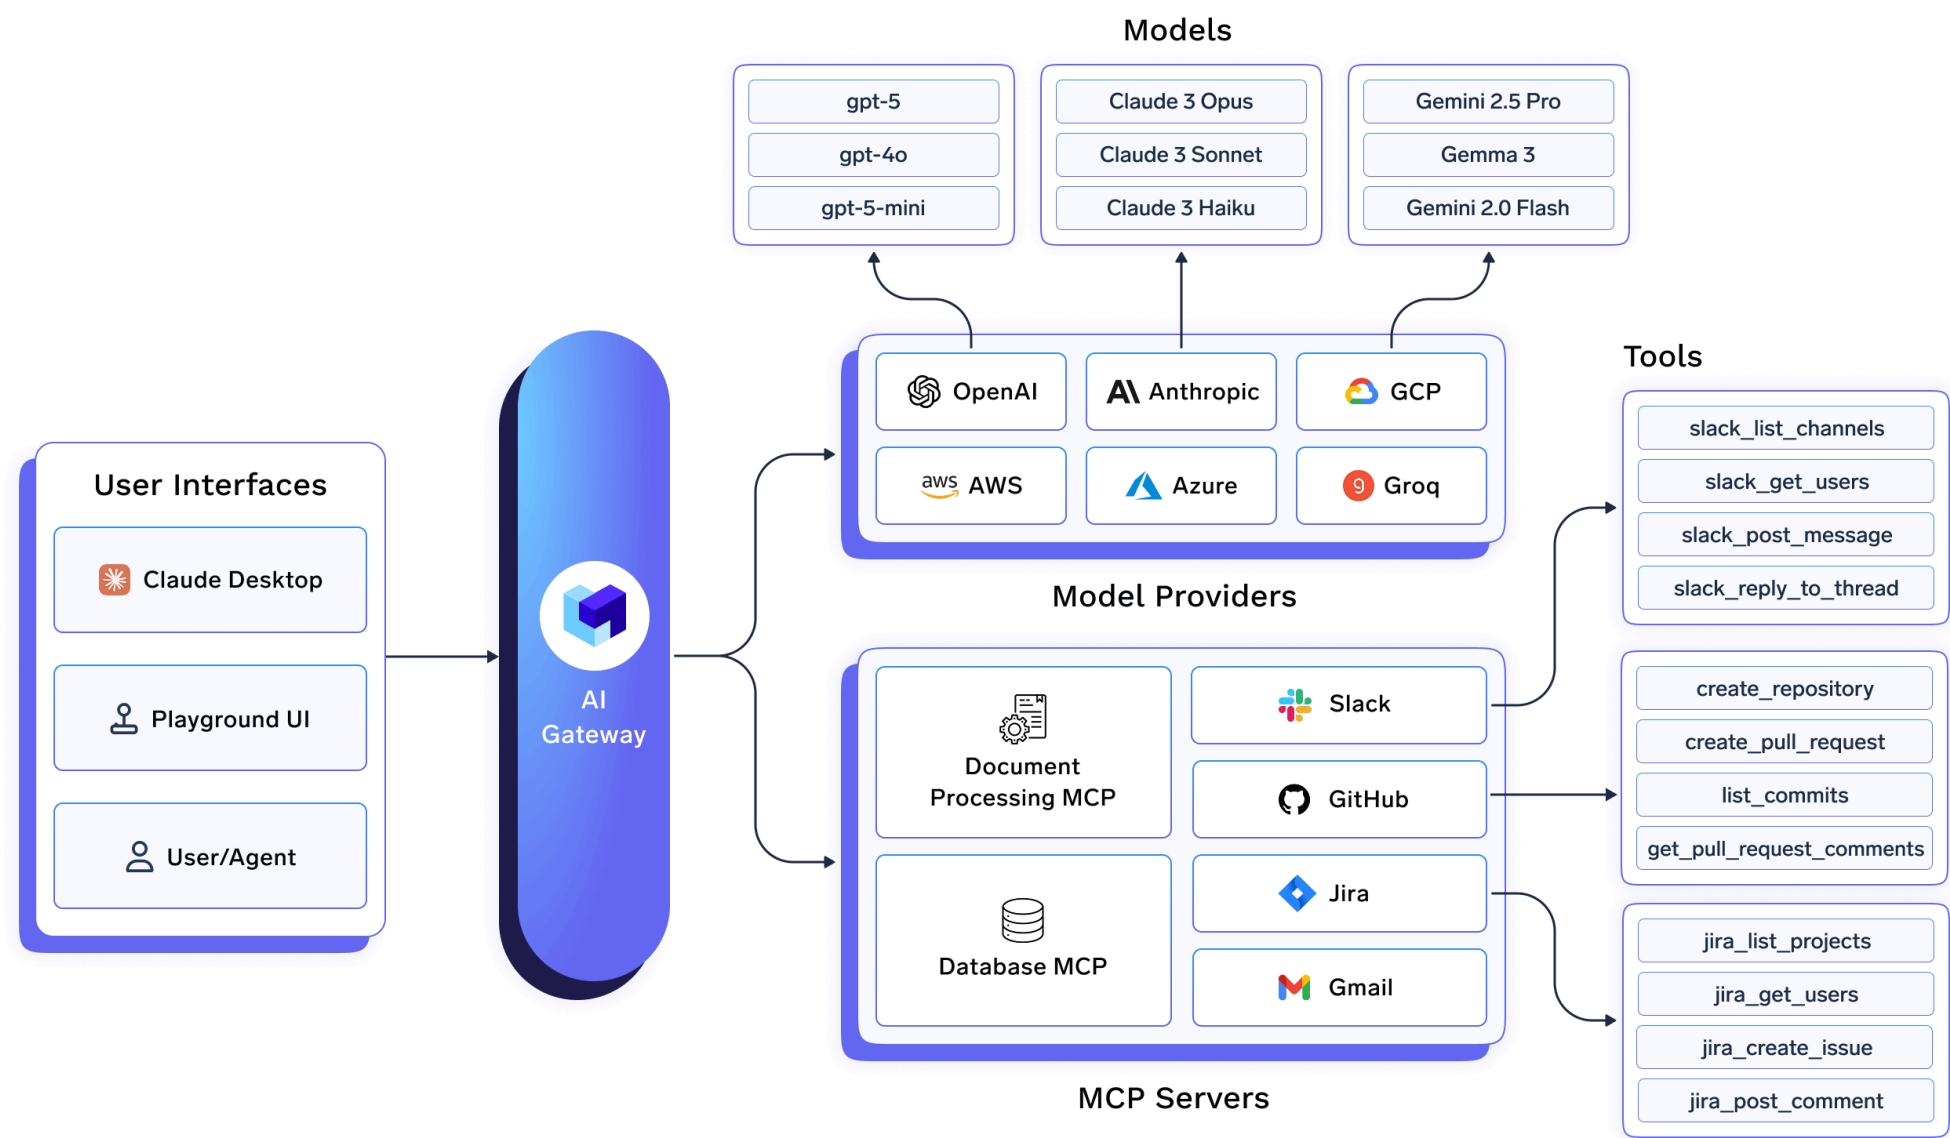

The central control plane for *Agentic AI*

Anant Agarwal
Principal Applied Scientist

We have built an **integrated AI Gateway control plane** to manage your Agentic AI traffic!

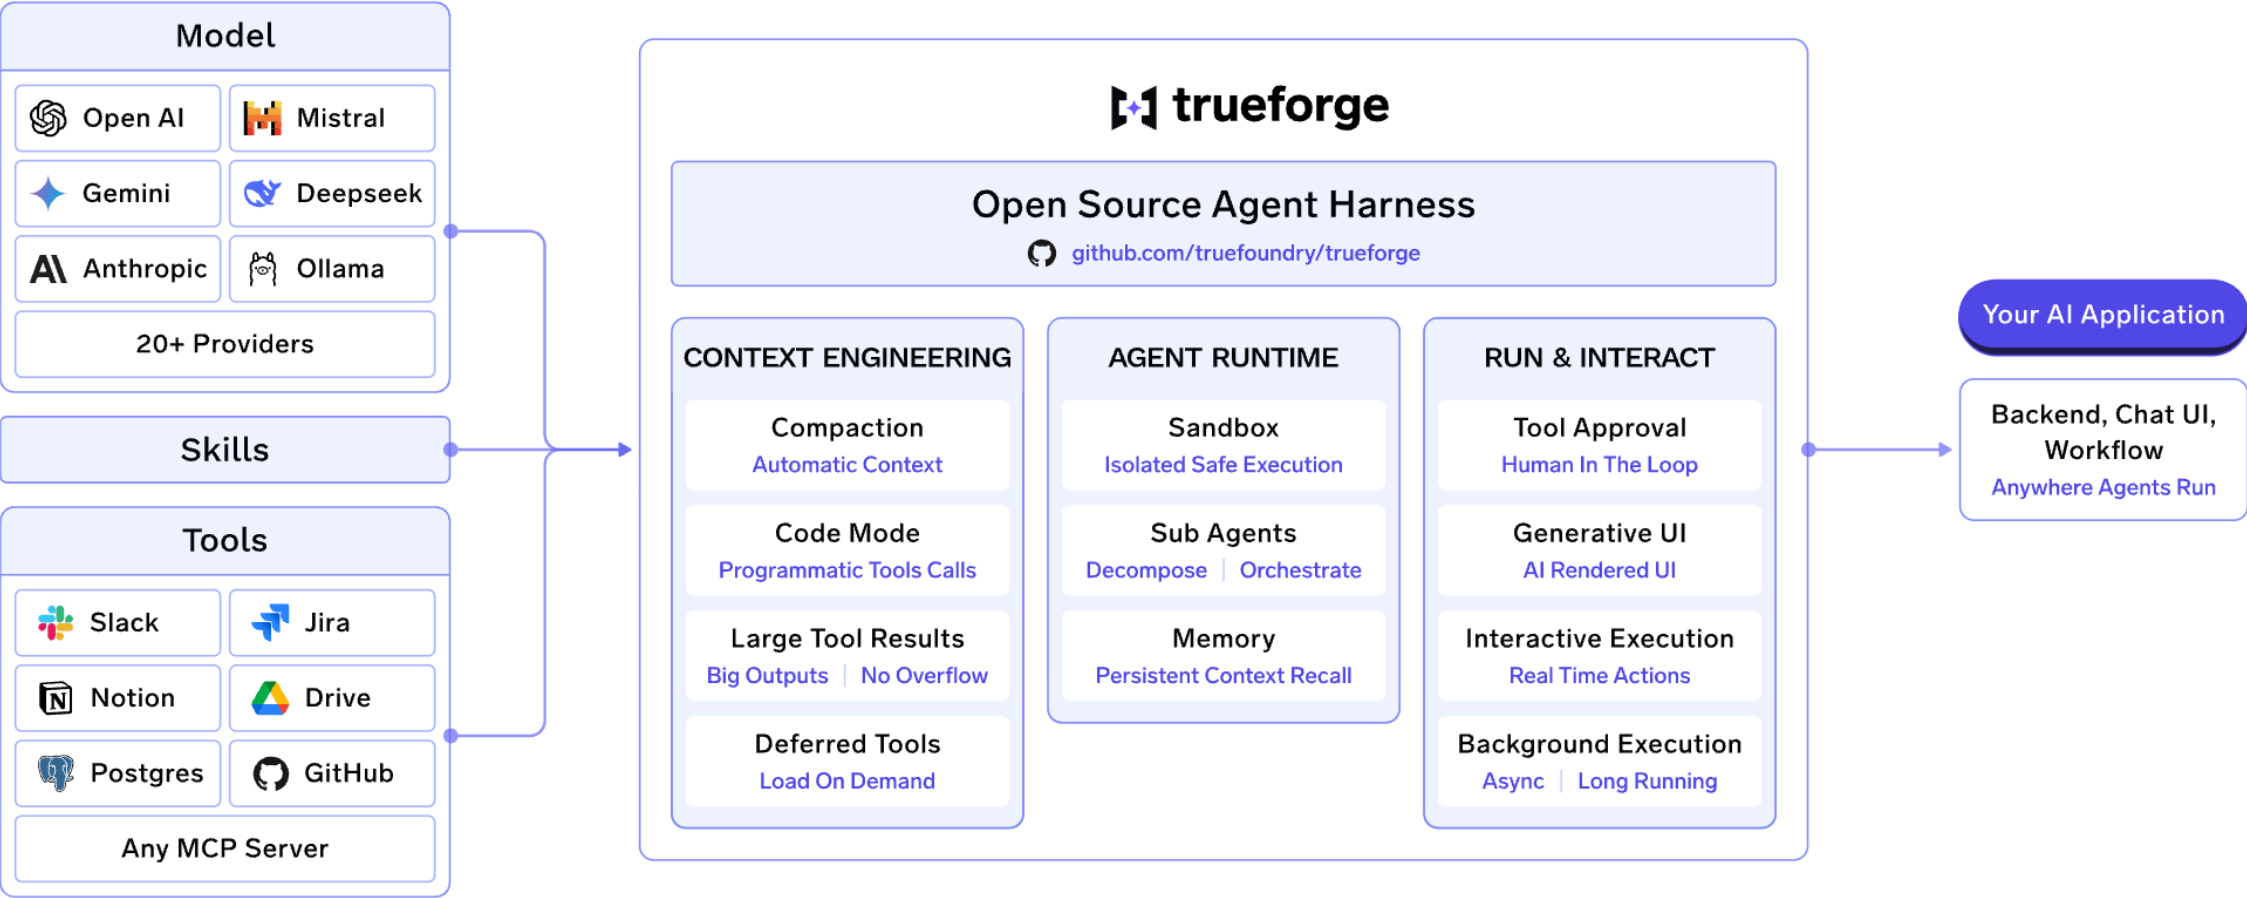

Introducing TrueForge

Open-Source Agent Harness

We condensed our learnings to **launch TrueForge in August 2026!**

Let's Get Started!

₹3,00,000

TOTAL PRIZE POOL • ALL CASH • INR

// BUILD PRIZES • ₹2,25,000

FIRST PLACE

₹1,00,000

Winning team, judged on the day

SECOND PLACE

₹75,000

Runner-up team

THIRD PLACE

₹50,000

Third-placed team

// COMMUNITY PRIZES • ₹75,000

BEST BUILD STORY

₹50,000

Best public write-up, thread, or demo video
about the job you handed over and how you
wired it up

RUNNER-UP BUILD STORY

₹25,000

Second-best public build story

Level 1: What Submissions Should Have

#	Artifact	Specification	Where it goes
01	Demo video	Screen recording of the working solution. Maximum 3 minutes 00 seconds — hard cap. Must include a segment of at least 30 seconds showing TrueForge in use (UI, SDK or API). MP4, 1080p, audio narration or captions.	Google Drive, shared publicly. Link pasted in the submission form.
02	Solution writeup	Two pages maximum (~300 words). Must cover: the problem, what the agent reaches, where it stops, the architecture, how TrueForge was used, what is real versus mocked, and known limits.	PDF in the repo root, or the repo README. Link in the form.
03	GitHub repository	Public. Open licence (MIT or Apache-2.0). README with setup steps and an .env.example. Commit history visible — not a single squashed dump.	github.com URL in the submission form.

Level 2: Live Demos

Top 7 Teams

- **Format:** 8 mins presentation + 4 mins Q&A + 1 min for changeovers
- **Key points:**
 - Live demo
 - Depth under questioning on architecture, TrueForge usage and limits
 - Impact and communications

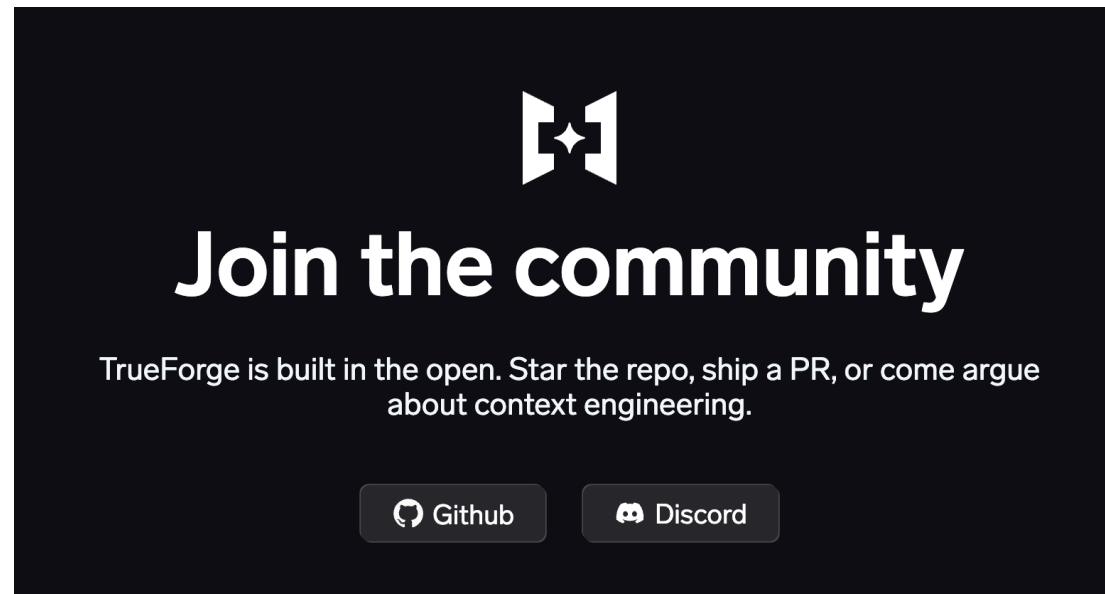

WIN the Social Media Prize (ends Monday 28th Sep 11:59PM)

#agentshatact

Put this hashtag beside all the social media details. This is how we can track all your posts.
